Coro & Coro moon
for projects

Occhio

Coro – Minimalism redefined

With Coro, Occhio is taking its purist philosophy to the next level: Coro completes the product portfolio with smaller, very slim pendant luminaires and innovative recessed and surface-mounted spotlights. Coro luminaires and spotlights have zoom optics for perfect lighting effects. Lenses characteristic of Occhio provide glare-free, directed light. Fascinating surface and color combinations allow them to interact perfectly with their surroundings.

Coro moon – the magic of the moon

Coro moon utilises the innovative Occhio fireball technology in all its power. From the cool glow of the moon to a warm atmosphere, anything is possible with the Occhio fireball and its fascinating, directed light. A special highlight: whether recessed or surface-mounted spotlight, whether swiveling or as a downlight: the Occhio fireball always remains in the centre, but the light is directed wherever it is needed – simply ingenious.

The image is a composite. The top portion shows three circular recessed ceiling lights, each with a white, dome-shaped lens, set into a dark ceiling. They cast a soft, circular glow. Below the ceiling, a dark blue, vertically pleated curtain hangs, filling the lower half of the frame. The lighting from the fixtures creates subtle highlights and shadows on the folds of the curtain.

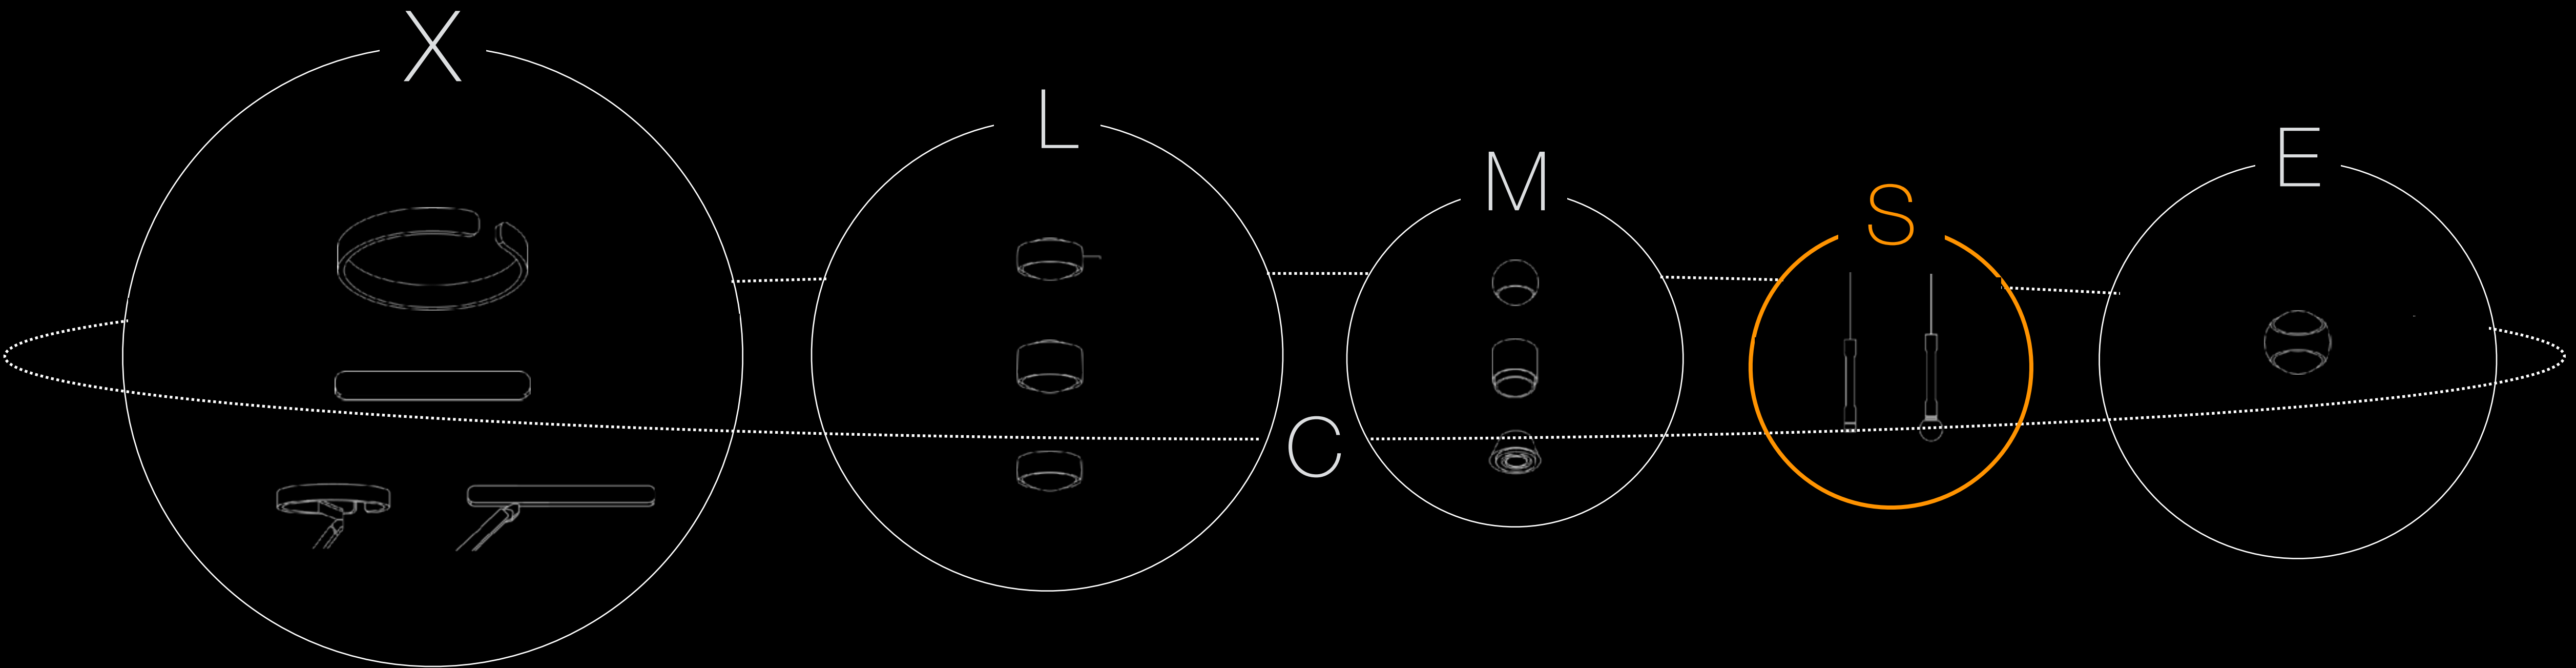

Occhio

Pro Versions – less is more

Luminaires, spotlights and downlights from the Coro and Coro moon series are now available as simplified Pro versions (constant current) without integrated electronics for operation with standard, external ballasts – ideal for lighting concepts in projects.

universe of light

Occhio

With the S series, Occhio completes the universe of light, bringing the holistic design of rooms and entire buildings to perfection with light from Occhio. The purist pendant luminaires, compact spotlights and downlights from Coro and Coro moon offer a wide range of possible applications, particularly in projects.

Coro & Coro moon cv versions

From Q3|25

Spectacular as an ensemble

Pendant luminaires from the Coro and Coro moon series become spectacular light installations for a wide variety of table situations when arranged as a 'cloud' or 'spider cloud'. Synchronisation via Occhio air enables a fascinating orchestration of the light.
